

JURASSIC WORLD

A few years ago Charlie and Jack went to Jurassic world. It is a place where dinosaurs live in the wild. It is an Action Park where people can go on rides and also they can see all of the dinosaurs. A scientist managed to make dinosaurs from the DNA of an egg that he found.

Charlie and Jack had to fly to Jurassic World in a plane because that is the only way that you can get to the park. If they go in a boat the alligatorsaurus will eat the boat.

While they were exploring Jurassic World, Charlie fell off the banister above the raptors. Luckily, he wasn't injured but when he looked around he saw that the raptors were coming towards him and they looked hungry!

When Jack saw what had happened, he immediately ran to open the gate. The raptors were coming close to Charlie. Jack managed to distract them for a moment and just in time, Charlie ran out of the raptors cage. He had a lucky escape.
